

Lumipulse β -Amyloid Plasma Value Sheets

We are communicating an update regarding the contents of the Lumipulse β -Amyloid Plasma Controls kit (part number 81300). The Lumipulse β -Amyloid Plasma Controls remain unchanged, however, please take notice that there will be four value sheets (as illustrated below) inside the control kit box starting with Lot # T8B6116R and all future lots. These value sheets provide the values to be used with version 1 and 2 of the immunoreaction cartridges as noted in the table below. As a reminder, the "N" in the product name designates the version 2 of the test (e.g., A β 1-40-N).

Thank you for your continued business and partnership with Fujirebio Diagnostics Inc.

Product Name	Part Number
